

Words of Warning

**Try out your search first
to see if the text is
found.**

Hit **Find**

**Then try just one
Change.**

Hit **Change**

**Use Undo to go back if
not correct. Don't hit
Change All until you are
certain**

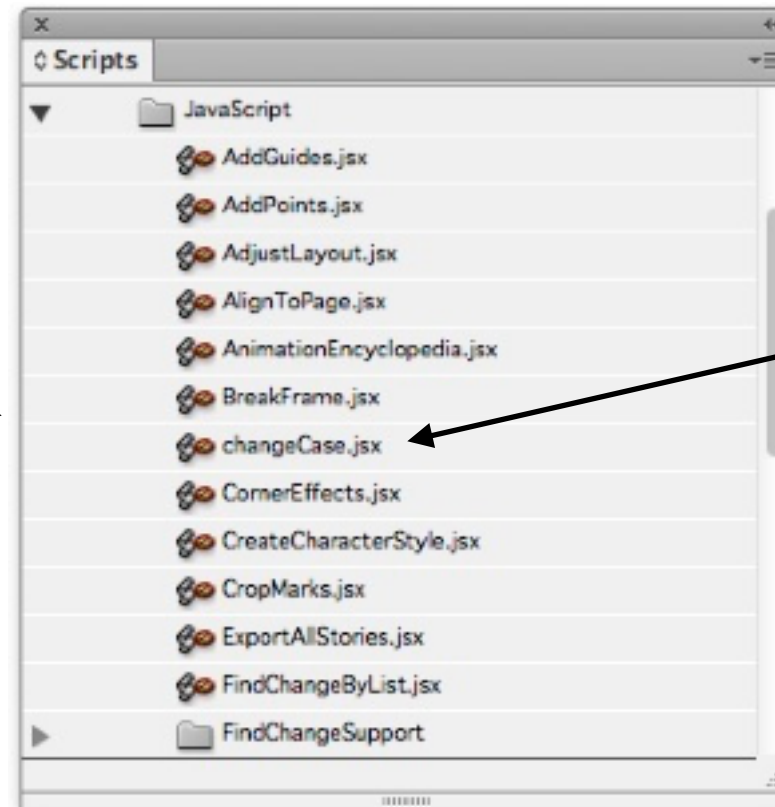

Issues and Solutions

***InDesign* is not good at providing some changes to text.**

Sometimes we need to resort to processing the text outside of *InDesign*

BEdit is good for this

Otherwise we can use a **Script inside *InDesign***

Changing case is one example
(change to uppercase or lowercase or titlecase)
