And my dear father. How features are abroad,  
I am skilless of; but, by my modesty,  
The jewel in my dower, I would not wish  
Any companion in the world but you;  
◆ Nor can imagination form a shape,  
Besides yourself, to like of. But I prattle  
Something too wildly, and my father's precepts  
I therein do forget.

## FERDINAND

I am, in my condition,  
A prince, Miranda; I do think, a king –  
I would not so! – and would no more endure  
◆ This wooden slavery than to suffer  
The flesh-fly blow my mouth. Hear my soul speak:  
The very instant that I saw you, did  
My heart fly to your service; there resides  
To make me slave to it; and for your sake  
Am I this patient log-man.

# The World Wide Web

The first iteration of HTML ensured that it was possible to navigate through **hypertext** links.

A source anchor, leads to a destination, that could be elsewhere on that page or, to another web page altogether. The browser back button reverses the step.

*The image here shows the first standard way to show a hypertext link with blue underlined text.*
