

InDesign - Style and Structure?

- with **InDesign** you can build a *taxonomy* for the publication by using the **tag** window and the **structure** pane
- tags can be mapped to style names to build the structure
- content will be tagged and can be customised
- InDesign can **import** XML and use a DTD to check conformity
- InDesign can **export** XML >>>

InDesign can Export valid XML

- Providing that all content has a style attached
 - Paragraph, character, object and table styles
- and no content is left un-styled - using overrides
- and no empty paragraphs exist in the content
- and all styles have their equivalent tags
- and all styles and tags are mapped to each other
