# Issues and Solutions

InDesign is not good at providing some changes to text.

Sometimes we need to resort to processing the text outside of *InDesign*

→ BBedit is good for this

Otherwise we can use a **Script** inside *InDesign* →

Scripts

JavaScript
- AddGuides.jsx
- AddPoints.jsx
- AdjustLayout.jsx
- AlignToPage.jsx
- AnimationEncyclopedia.jsx
- BreakFrame.jsx
- changeCase.jsx
- CornerEffects.jsx
- CreateCharacterStyle.jsx
- CropMarks.jsx
- ExportAllStories.jsx
- FindChangeByList.jsx
- FindChangeSupport

Changing case is one example
(change to uppercase or lowercase or titlecase)

Demo time

Thank You
